Societal Impact of Pain

Dr. Alberto Grua
Executive Vice
President
Grünenthal GmbH
Europe & Australia

„Pain“ – a Day-by-day reality for millions

Society lacks data on pain care

We need to prevent under- over- and mistreatment

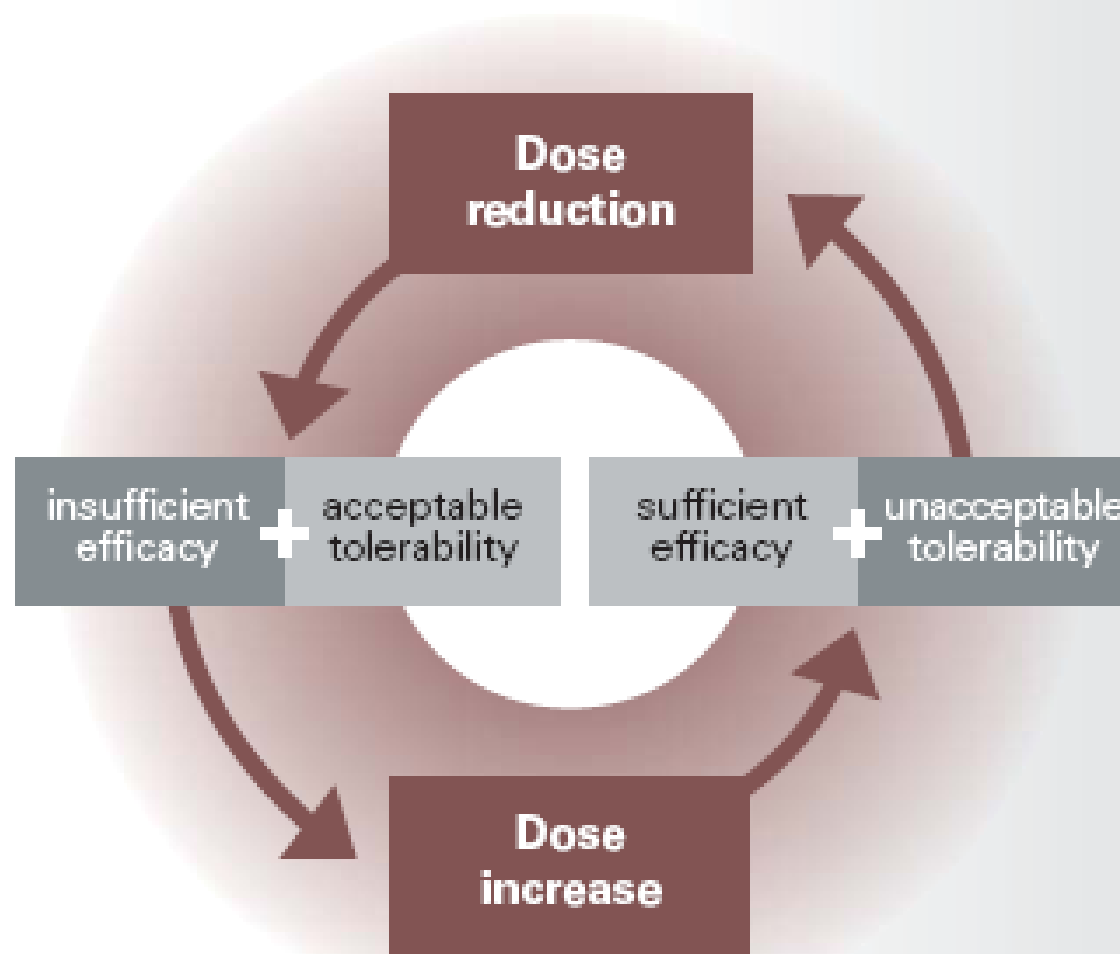

**Today one sixth of the EU-
population are elderly
people with a higher need
for health care and
pharmaceutical resources**

We need to ensure access to pain care

Pain Treatment can become a Vicious Circle

How can we be sure of the....

... acknowledgement of the social impact of pain

... timely and adequate access to pain care

... awareness of the medical, financial and social impact of pain

... implementation of prevention and education programmes

... future research and innovation in pain care

... exchange of best practices

... monitoring societal outcomes in pain care

Giustino Thank YOU

Buon appetito!
