

ISAL Foundation was established in 1993 by the will of **Prof. William Raffaelli** aiming to help pain sufferers and promote the establishment and spreading of a specialist culture in pain treatment.

To this purpose ISAL created

A training Institute for health education aiming to establish a network of experts in pain therapy.
A network of independent researchers who cooperate to expand knowledge on chronic pain.

There is an Epidemic Morbus named “ Chronic Pain”

But

People with Pain are like Ghosts

No Face No Expression

None see them and None see their Disability

What We have to Do

***We Must Telling to People and Governements that
People with “Chronic Pain” Exist and that Life in
Pain can be terrible***

***Some Pain Diseases, as the Central Pain, are a
Drama***

***Like the tears of a mother looking for her missing
son***

***day on day she is moving to look for him with
the heart broken in pain and will suffer all the life.***

***So the brain ,crying day for day,
is looking for its ghost arm in pain***

These is the “Pain as Disease”

***Raffaeli W. Verso la felicità – segnaletiche francescane
2015***

First Step

Social Media and Communication

What ISAL have done to sensibelize italian community

*Till 2009 an awareness campaign
 “ 100 hundred cities against pain “*

Cento Città contro il dolore
 Una rete solidale per la cura della sofferenza

“One hundred cities against pain”, a project aimed at raising awareness on pain therapy.
 A supportive network of associations and pain suffering citizens

Sabato 3 Ottobre 2015
 Giornata Mondiale
 Cento Città contro il dolore

“Io lotto contro il tempo, Isal contro il dolore”

Sostieni la ricerca per dare vita a un tempo *senza dolore.*

- Con l'Alto Patronato della Presidenza della Repubblica
- 

ISAL was invited into the “ Giro d’Italia “ the International Bike competition

Second Mission Pain Research

ISAL is working with the Ministry of Health to realise in Italy the first Institute for Research on Pain

We have a network of 7 young researchers that are working on Biomarkers for Pain

sperimentale

In collaborazione con l'Università di Roma Tre, Istituto San Raffaele Pisana (Roma), National Institute on Drug Abuse (Baltimore), Sbarro Institute for Cancer Research and Molecular Medicine (Philadelphia).

ricerca applicata sulle migliori pratiche di terapia con i farmaci

Consolidamento del Registro Nazionale sul buon uso degli oppioidi e sistemi impiantabili. Genetica e dolore.

indagine osservazionale

Studio conoscitivo sull'utilizzo degli analgesici centrali nella gestione del dolore.

indagine epidemiologica

Indagini epidemiologiche, studio sul dolore nella malattia.

indagine sui social media

Studio sulla narrazione del dolore sulle piattaforme sociali.
